

V. RATER'S COMMENTS FACTS AND SPECIFIC ACHIEVEMENTS: SSgt Hensley is one of the most outstanding and aggressive personnel assigned to this section. He consistently accepts all duties and NCO responsibilities and accomplished them with superb results. Recently, this was noted when he was tasked to build a Bare Base display. He hand carved and painted 938 Bare Base equipment items used for a 500 person/12 primary aircraft authorization Bare Base aircraft support package. His model was built to scale and covers 120 square feet. This model is now on permanent display in the 833d Air Division Headquarters building. His efforts have given command personnel a valuable tool to be used to explain the unique mission of the 4449th Mobility Support Squadron. Another example of his skills was the self-help remodeling of the offices and break room of the Structural Repair and Inspection Shop. He and one other person added one office and enhanced the break room. They removed, added, and paneled walls, plus installed doors and tiled the floors. This project improved the overall appearance and morale of the entire section. STRENGTHS: SSgt Hensley's greatest strength is his willingness to tackle major projects with enthusiasm. EDUCATIONAL AND TRAINING ACCOMPLISHMENTS: SSgt Hensley is currently enrolled in Career Development Course 1100 to meet his management requirements for upgrade to the 7-skill level. OTHER COMMENTS: SSgt Hensley is a highly capable NCO whose dress and appearance sets the example for others to follow. I recommend promotion.

VI. 1ST INDORSER'S COMMENTS  CONCUR  NONCONCUR  
 SSgt Hensley accepts any challenge with eagerness. He would never settle with only meeting the standard, they must be exceeded. One example was his room in the barracks. His room was the "best" and was used as an example for the rest of the residents by the squadron commander. His contribution raised the standards for the entire barracks. He is also a volunteer for the Base Search and Recovery Team. Let's challenge him as a technical sergeant!

VII. 2D INDORSER'S COMMENTS  CONCUR  NONCONCUR  
 SSgt Hensley is highly competent and eager to excel. When the squadron received a computerized engraver, he taught himself the procedures and operation of the entire system. Without any prior knowledge of computers this was quite a feat. The programs he developed have greatly enhanced the commander's recognition program. Promote.

VIII. 3D INDORSER'S COMMENTS  CONCUR  NONCONCUR  
 SSgt Hensley is a highly dedicated NCO who gives 110 percent to every project. He expended over 2,000 hours of overtime building a miniature Bare Base model that was presented to the 833 AD and is now displayed in the HQ Building where it will be viewed by thousands of visitors annually. An outstanding NCO--send to PME and promote.
