V. RATER'S COMMENTS

- Outstanding team leader whose technical expertise proved indispensable during recent Phase I Exercise
 - Completed over 120 RAM maintenance hours prior to aircraft departure to Base X destination
- Instrumental in the design and manufacturing of a special polymer template for use prior to the RAM removal process during scheduled F-117A Stealth Fighter aircraft phase inspections
 - Reduced amount of required LO RAM maintenance required for completion of phase inspections
- Vital member during the inspection and maintenance of eight F-117A Stealth Fighter aircraft scheduled for RCS mission completion--all aircraft passed standards for Low Observables "zero" specifications
- Section trainer during implementation of corrosion control task certification of five LO section personnel
 - Provided superior technical leadership and hands-on application skills to ensure training completion
- Supervised the technically demanding MARS maintenance on an assigned F-117A aircraft wingtip panel
 - Led his crew to completion of maintenance ahead of schedule to allow aircraft to meet its mission
- Assisted in the detrimental repair of a cracked pitot probe discovered during a preflight inspection
 - Followed technical guidelines to perform critical platelet replacement prior to the next mission--promote

I certify that in accordance with AFI 36-2403 an initial feedback session was conducted on 6 Sep 96, and a midterm feedback session was conducted on 12 Dec 96. (If not accomplished, state the reason).
